Summary

Software engineer since 2015 with experience across multiple domains and technology stacks. In leadership roles since 2021, leading distributed teams, shaping system architecture, and mentoring engineers to deliver scalable, reliable products. Known for a pragmatic approach to engineering, with a strong focus on maintainability and aligning technical decisions with business objectives.

Experience

Linguise (USA) — Tech Lead

https://www.linguise.com

Linguise is an AI powered translation SaaS.

Type: Full Time Remote
Period: June 2024 – Present

- Lead a development team by providing technical direction and ensuring alignment with company objectives.
- Design and implement scalable system architectures using Node.js, MySQL, Meilisearch, and React.
- Mentor junior developers and promote best practices in coding standards, testing, and code review processes.
- Collaborate closely with the CTO and CEO to translate business requirements into technical solutions and product roadmaps.
- Spearhead the integration of Linguise's translation services with multiple CMS platforms and new technologies.
- Help the team use AI effectively through agentic engineering practices.

Ravenstack Pte Ltd (Singapore) — Senior Software Engineer

Ravenstack is a SaaS that helps companies hire employees easily.

Type: Full Time Remote
Period: April 2021 – June 2024

- Designed and developed products using PHP (Symfony) for backend services and JavaScript (Vue.js, Nuxt.js) for frontend applications.
- Worked with MySQL and MongoDB for data storage and system scalability.
- Performed software performance analysis, optimization, and refactoring.
- Configured and managed AWS infrastructure including EC2, S3, and ECR.
- Built and maintained CI/CD pipelines for automated testing and deployment.
- Researched and coordinated with the CTO on technology choices and long-term technical direction.
- Conducted code reviews, unit testing, and documentation to maintain development standards.
- Supported and mentored junior engineers on technical challenges.
- Collaborated closely with the product owner to translate business requirements into technical implementations.

PT Lightmedia Inovasi Teknologi (Indonesia) — Software Engineer

https://www.limecommerce.com

PT Lightmedia Inovasi Teknologi is a software house focused on building e-commerce web apps for clients.

Type: Full Time Remote
Period: May 2018 – April 2021

- Developed web applications using PHP (Magento 1 & 2) and JavaScript (Node.js for backend, React for frontend).
- Built internal CLI tools using Node.js, Python, and Bash scripting.
- Developed Lightmedia web and desktop products using JavaScript (Node.js for web applications and Electron for desktop applications).

PT Arkamaya (Indonesia) — Software Engineer

https://arkamaya.co.id

PT Arkamaya is a software house building solutions for large enterprises across government, automotive, food industries, and more.

Type: Full Time Onsite
Period: July 2016 – May 2018

- Developed web applications using C# (ASP.NET MVC) and PHP (Laravel, CodeIgniter).
- Contributed to Arkamaya's internal web product built with PHP (CodeIgniter).

Freelance (Indonesia) — Software Engineer

Type: Project-based
Period: May 2015 – July 2016

- Developed web and desktop applications for local government institutions and universities in Bandung.
- Technologies included PHP (CodeIgniter, Laravel, WordPress) for web applications and Java (JavaFX) for desktop applications.

Notable Open-Source Contribution

StumpWM

- Top 20 contributor to StumpWM, a tiling and keyboard-driven X11 window manager written entirely in Common Lisp.

Professional Value

My core value is helping the team grow together. I care more about seeing each person become a better version of themselves than chasing the idea of a 10x engineer. I don't need a 10x engineer. I need a 100x team, and with a genuine culture of learning and the right use of AI, that is within reach.

Responsibility is at the heart of it. Engineers who stay curious, own their work, lift each other up, and genuinely care about the business impact they create. That is the kind of team I want to build and lead.
